

RESIZING OF IMAGES

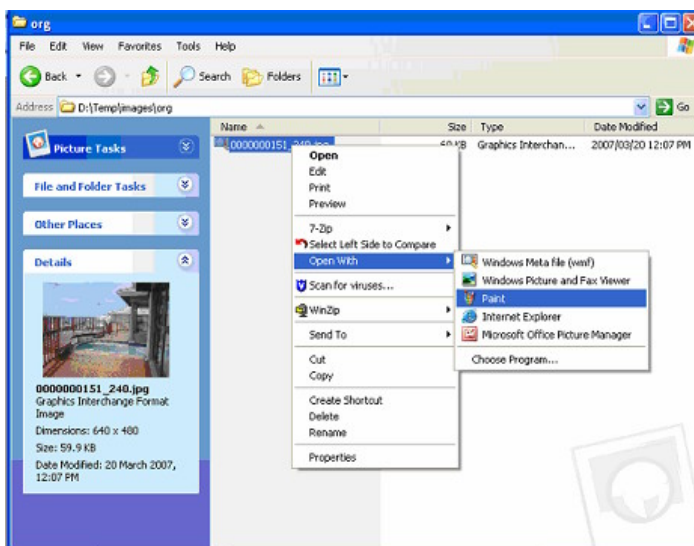

For easy resizing of images, www.saopenhomes.co.za has put together a step-by-step guide. Ideally the images you upload to www.saopenhomes.co.za should be 50 KB or less and have dimensions of approx 320 x 240 – This will give you both speed and image quality.

Ensure that you load four good quality pictures for each property to make certain your properties get the best exposure!

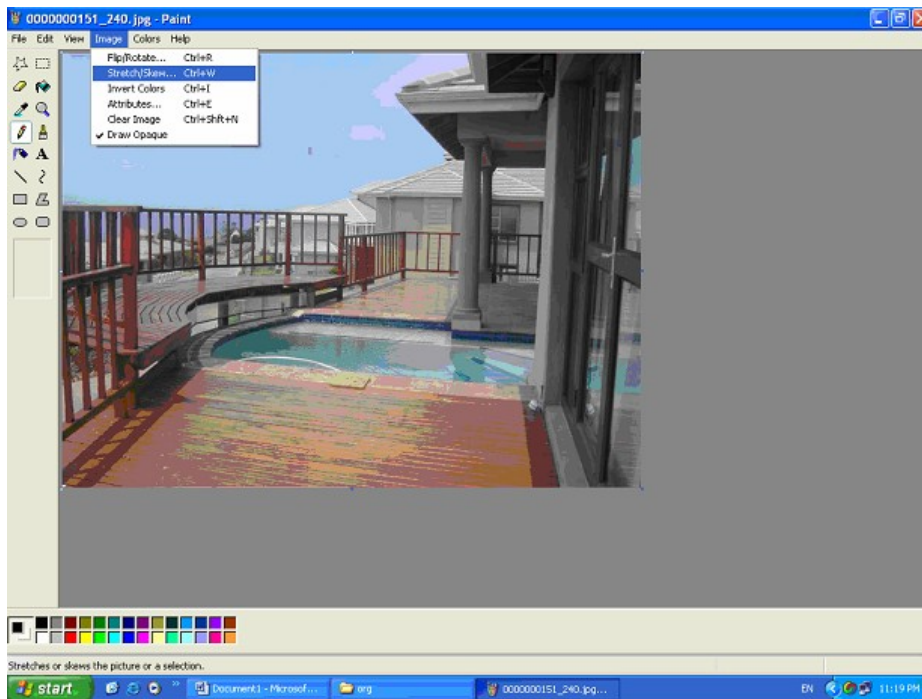

1. **Save** your photograph in a directory/path that you will remember. We advise that you work on a copy of the original and not the original.

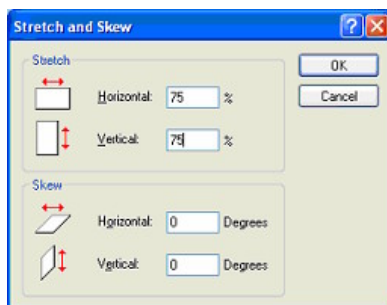

2. Right click on the image and select “**Open with**” and select “**Paint**”.

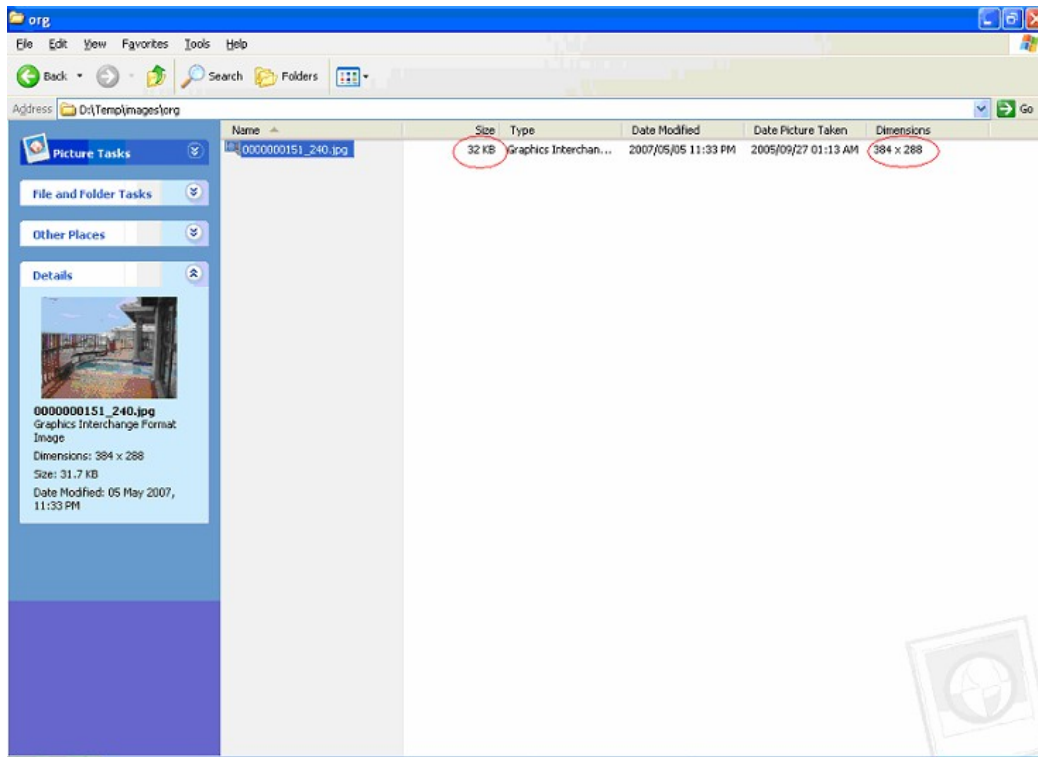

3. In Paint go to “Image” and select “Stretch/Skew...”

4. Depending on the size of your image, **change** the Stretch from 100% to something lower, like 75%. **Save** the image, go back to the folder and check the size. Ideally the image should be 50 KB or less and have dimensions of approx 320 x 240

5. Keep on lowering the stretch % down until your image size is lower than 50 KB

Ensure that you load four good quality pictures for each property to make certain your properties get the best exposure!
